

OSCAR BELTRAN

MANUFACTURING SYSTEMS | DATA ANALYTICS | DIGITAL TRANSFORMATION | SUPPLY CHAIN

PROFILE

Industrial Engineer, Business Administrator, and Master of Engineering with 20+ years of experience across manufacturing, supply chain, procurement, demand planning, inventory, operations, and data analytics.

Specialized in process optimization, operational analytics, automation, and digital transformation initiatives within manufacturing and supply chain environments. Strong experience developing KPIs, dashboards, automated reporting systems, and internal operational tools using Excel, Power BI, Python, SQL, and modern web technologies.

Combines operational business expertise with technical development capabilities to improve productivity, reduce manual processes, enhance traceability, support data-driven decision-making, and deliver digital solutions for manufacturing and supply chain environments.

SKILLS

Technical:

- **Data Analytics & Automation:** Python (Pandas, NumPy), SQL, Excel (VBA, Macros), Power BI
- **Web Development:** JavaScript, TypeScript, React, Next.js, Node.js, Express.js, HTML, CSS, Tailwind CSS
- **Data bases:** PostgreSQL, SQLite, MongoDB, Prisma ORM
- **Manufacturing & Operations:** KPI development, process optimization, workflow automation, production support
- **Supply Chain & Procurement:** Demand planning, inventory optimization, procurement, vendor management
- **Platforms & Tools:** SharePoint, Microsoft Forms, Power Automate, Git/GitHub

LANGUAGES

- **Spanish:** Native
- **English:** Professional Working Proficiency

EDUCATION

- **Master of Engineering** | Pontifical Javeriana University
- **Business Administration** | Pontifical Javeriana University
- **Industrial Engineering Technologist** | Colombian Center for Professional Studies

WORK EXPERIENCE

WALTHER ELECTRIC

Quality Control Technician | Process Improvement & Data Automation | 2026 – Present

- Support quality control operations within a manufacturing environment, ensuring compliance with operational and quality standards.
- Inspect incoming drums and components from suppliers while maintaining traceability and documentation through SharePoint-based systems.
- Coordinate calibration tracking and compliance activities for production tools and measurement equipment using external vendor platforms.
- Developed validations, controls, and automations in SharePoint to reduce manual errors and improve usability for production and QC teams.
- Perform operational data analysis and KPI reporting focused on non-conformities, productivity, labor utilization, overtime, resistance measurements, and tolerance performance.
- Support engineering teams with software installation, troubleshooting, and process automation initiatives.
- Leading the development of an internal web platform using Next.js, TypeScript, Python, Prisma, and SQLite to digitize and centralize QC documentation, traceability, scheduling, and operational workflows.

BEACH CAMERA

Quality Inspector / Process Improvement

- Inspect monitors and TVs to ensure product quality and compliance with manufacturer specifications.
- Manage device documentation, labeling and secure packaging to minimize damage and returns.
- Reset and configure devices prior to shipment and maintain accurate inventory records.
- Initiated and co-developed a small web application to track daily worker productivity, automate label requests, and generate printable barcode labels—integrated with automated Excel dashboards used for KPI tracking.
- Implemented role-based access and user authentication to control label creation and printing workflows.

TECNOQUIMICAS S.A.

Plant Administrative Coordinator

- Led the creation and monitoring of an annual budget of \$5M, maintaining a variance under 4%.
- Optimized production scheduling, increasing efficiency by 25% and reducing downtime.
- Developed executive dashboards in Power BI, reducing analysis and decision-making time by 70%.

Planning and Procurement Leader

- Implemented improvements in supply planning, achieving a 20% reduction in inventory costs.
- Negotiated contracts with key suppliers, improving delivery terms and reducing lead times by 17%.
- Automated procurement and inventory management processes using Excel and SQL, cutting manual analysis time by 40%.

Supply Chain Analyst

- Designed demand models that improved forecast accuracy by 30%.
- Implemented automation in Excel and Python, cutting manual reporting time by 60%.
- Managed key performance indicators (KPIs), achieving 15% logistics cost optimization.
- Led collaboration with marketing and sales teams to align forecasts with promotional activities.
